

Operation & Warranty

K-9 BSD-2

07/01/2005 updated 04/12/2006

Operation:

1. Manually compress piston w/push tube.
2. Turn receiver power switch on.
3. Insert reward item.
4. Release w/hand held transmitter.

Device is preset to eject large Kong 12 inches, can also be adjusted for use with a variety of rewards. To include rubber ball, tennis ball, or towel.

Battery charger is automatic to prevent overcharge. Red LED light on charging Green LED on Charged. Can be activated 50 to 70 times between charges.

Avoid activating transmitter more than once in 30 seconds to insure maximum battery life.

Device is intended to be used with adapter plate for odor presentation directly above and around reward item. Warning! Never mix explosive compounds (cocktail) that may produce combustible vapor in container. Scent wicks are effective for liquids or a variety of other compounds.
